IOT(INTERNET OF THINGS) ASSIGNMENT 2

SmartFarmer -IOT Enabled smart farming application

DTAE :25-09-2022

TOPIC : Build a python code,assume u get temperature and humidity values(generated with random functions to a variable) and write a condition to continuously detect alaram in case of high temperature

NAME : Manoj Kumar.S

CODE:

```
import random

while True:
    a = random.randint(10, 99)
    b = random.randint(10, 99)
    if a > 30 and b > 65:
        print("high temperature and humidity of:", a,
b, "%", "alarms on")
    elif a < 34 and b < 60:
        print("Normal temperature and humidity of:",
a, b, "%", "alarms off")
        break
```

OUTPUT:

The screenshot displays the PyCharm IDE interface. The main editor window shows a Python script named `main.py` with the following code:

```
1 # TEAM LEAD(MANOJ KUMAR S)
2 import random
3
4 while True:
5     a = random.randint(10, 99)
6     b = random.randint(10, 99)
7     if a > 35 and b > 60:
8         print("high temperature and humidity of:", a, b, "%", "alarms on")
9     elif a < 35 and b < 60:
10        print("Normal temperature and humidity of:", a, b, "%", "alarms off")
11        break
```

Below the code editor, the Run console shows the execution output:

```
Run: main x
C:\Users\manoj\PycharmProjects\pythonProject\venv\Scripts\python.exe C:/Users/manoj/PycharmProjects/pythonProject/main
high temperature and humidity of: 45 90 % alarms on
high temperature and humidity of: 52 76 % alarms on
Normal temperature and humidity of: 21 28 % alarms off

Process finished with exit code 0
```

The status bar at the bottom indicates the file encoding is UTF-8, the line ending is CRLF, and the Python version is 3.10.

FIGURE 1: python code, to get temperature and humidity values.

*****THANKING YOU*****
