SPRINT-3: Mobile App/Web Application

To Develop the Application for Smartfarmer Iot enabled smart farming Application project using MIT App Inventor

- **MIT App Inventor** is an intuitive, visual programming environment that allows everyone even children to build fully functional apps for smartphones and tablets.
- Those new to MIT App Inventor can have a simple first app up and running in less than 30 minutes.
- And what's more, our blocks-based tool facilitates the creation of complex, high-impact apps in significantly less time than traditional programming environments.

The MIT App Inventor project seeks to democratize software development by empowering all people, especially young people, to move from technology consumption to technology creation.
